

ABDN Electrophysiology Introduction!

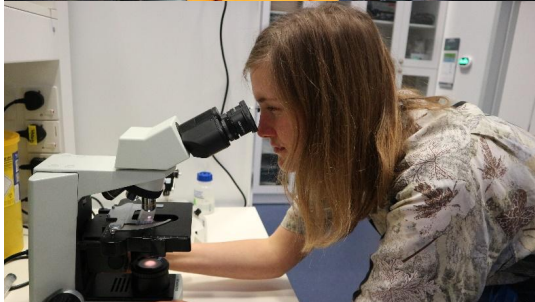

By Nicole Vissers, PhD student at the Sainsbury Wellcome Centre, London, UK

Who am I

Name: Nicole Vissers
From: the Netherlands
Moved to: London, January 2020

Currently:
Final year PhD student SWC

Environment and experience shape behaviours

Affection

Aversion

Learned safety

Dark overhead looms reliably trigger escape behaviour

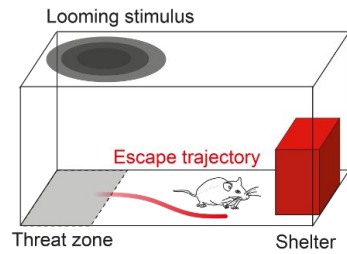

Fratzl et al., 2021

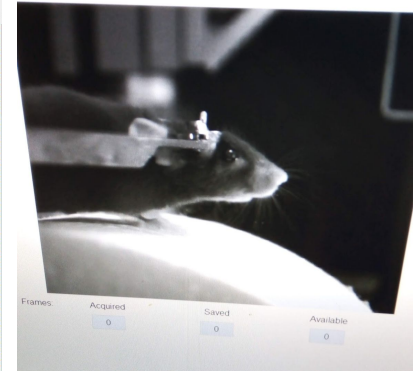

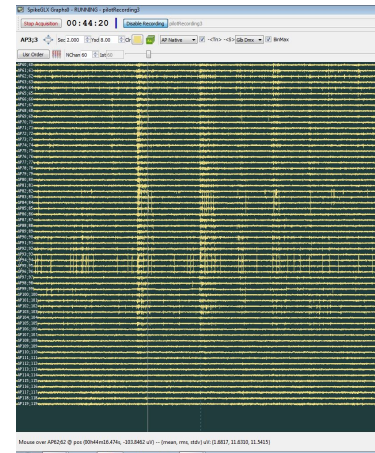

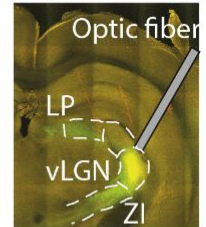

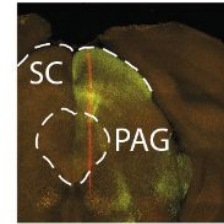

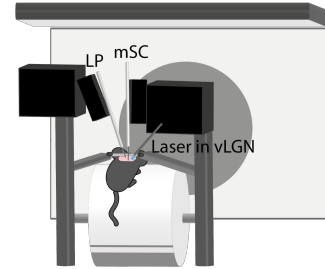

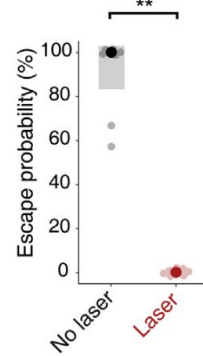

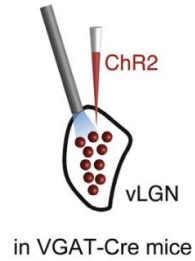

The role of the vLGN in visually-guided defensive behaviour

$vgat^+$ vLGN activation abolishes escapes

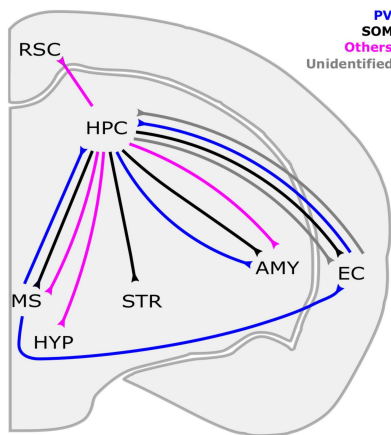

(Fratzl et al., 2021)

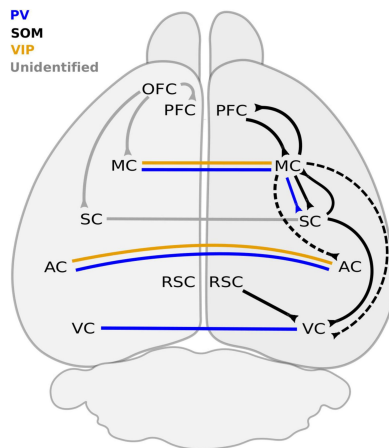

My interests: Long-range inhibitory projections in the brain

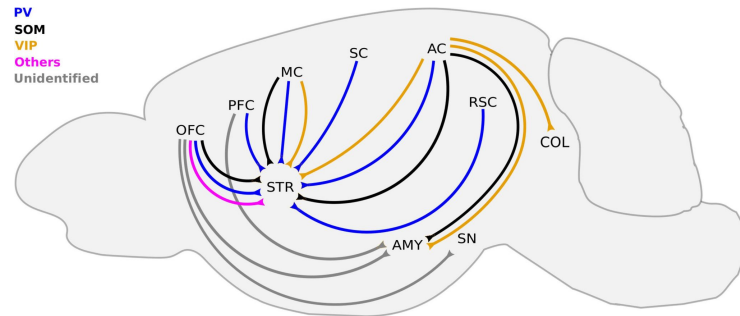

Hippocampus

Neocortex

Corticothalamic

(Urrutia-Piñones et al., 2022)

Combined with: Neuropeptides & Neuromodulation

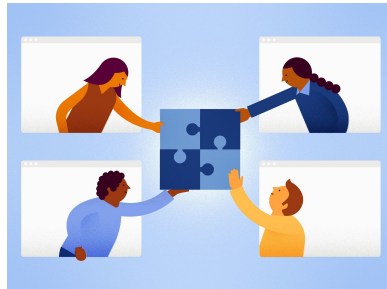

Goals for the ABDN fellowship

- Collaborate together to learn more about the brain and its analyses

Our collaborative goal:

- In teams of 2 write a review article that we will try to publish
- Everyone together write a data article with the data we have analyzed

Character Lab
